

NiceLabel

v4

NiceLabel Suite

NiceLabel Suite is a collection of powerful software tools for professional label design, printing and application integration. A wide range of options makes it a perfect and easy-to-use, wizard-driven tool for any labeling requirement, including RFID, compliance labeling and more.

NiceLabel Pro is included in NiceLabel Suite as the label design module. NiceLabel Pro includes support for all industry standard bar codes (including 2-D). Since users are often confronted with particular customer or industry (chemical, automotive, retail, etc.) compliance requests, NiceLabel Pro installs many industry standard label templates to get you printing quickly.

In addition, NiceLabel Suite includes: NiceForm, a rapid development tool for creating simple user interfaces for label printing operators; NiceWatch, a centralized label printing server to automate label printing; NicePrint, a pre-designed label production screen to simplify user interaction for printing; and Pocket NiceLabel, a mobile runtime environment to enable label printing from Windows Mobile and CE.NET.

NiceLabel Suite supports over 900 optimized thermal label printers as well as any standard office printer.

2000, ME, 98,
Windows NT®

Features and Specifications

NiceLabel Suite

FEATURES SUMMARY

NiceLabel Suite offers the user advanced connectivity and application development options for any type of labeling need. NiceLabel Suite includes the following software modules:

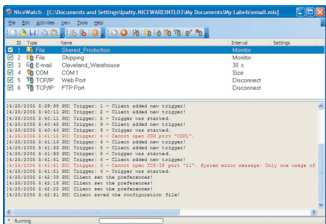

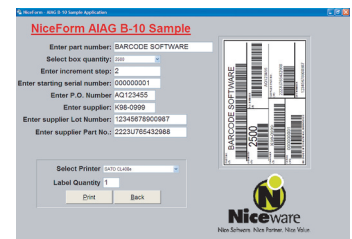

NiceLabel Pro | Label Designer

NiceLabel Pro is a full-featured labeling software designed for professional label design and printing, including complete database support and integration capabilities. A wide range of options makes it an easy-to-use, wizard-driven tool for any labeling requirement supporting RFID, UCC/EAN 128, other types of specialty identification, as well as Visual Basic Scripting, to create conditional logic processes.

NiceForm | Rapid User Interface Development

NiceForm is an application generator for labeling operations on a Windows PC or Windows CE mobile device. Users can design custom interfaces and multi-form applications to simplify the label printing experience for the operator. Data can be acquired from a serial (COM) port from weight scales, etc., in NiceForm. Though no custom programming knowledge is required, advanced features such as Visual Basic Scripting is available in NiceForm. NiceForm also allows database connectivity through advanced OLE DB or ODBC connectivity.

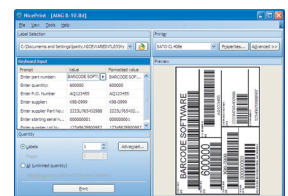

NiceWatch | Automated Print Server

NiceWatch is a centralized print server to automate label printing operations. NiceWatch can accept a print request from any mobile wireless, desktop, ERP or WMS application to automate label printing without user intervention. Print requests can be made through a file drop, a TCP/IP socket, an email message or a serial port device. Various data streams can be parsed and mapped to label variables in NiceWatch with text and XML parsing filters and Visual Basic Scripting.

NicePrint | Simplified, Pre-designed Label Production

NicePrint provides a pre-designed label production interface that is similar to NiceForm without the customization. The label printing operator will never be required to navigate the label software with NicePrint. NicePrint ensures error free label production.

Pocket NiceLabel | Mobile Label Design, Integration and Production

Pocket NiceLabel is a mobile runtime environment for integration and production of bar code and RFID labels from Windows Mobile and CE.NET devices. Labels are easily designed on a PC and synchronized to a mobile device.

Nice Software. Nice Partner. Nice Value.
